

Guelph Wellington Ontario Health Team

Working together to improve the health of our shared population

Ontario Health Teams are a way of organizing and delivering care that is more connected to patients in their local communities.

Partners of the Guelph Wellington Ontario Health Team (GW OHT) are working together throughout 2022-2025 to improve the health of the residents of Guelph and Wellington. To guide our work, three priorities were identified by our community, health and social service providers. The following describes how care will be different as a result of our collective work:

STRONGER INTEGRATION & COMMUNICATION

- A single team will work together to identify and meet all of each patient's health goals
- Information about each patient's health goals and care plans will be easily and safely shared among all members of the patient's team
- There will be better access to mental health and addictions services when and where patients need it most

IMPROVED HEALTH EQUITY

- Our work will reflect the diverse needs and perspectives of the communities we serve
- We will deliver care in more culturally responsive ways
- We will have data to better understand the health and social needs of our communities

PANDEMIC RECOVERY

- Health care workers will feel valued and have access to health & wellness resources. They will experience improved health & wellness
- GW OHT partners will be health and social service employers of choice
- Fewer residents will be waiting for care in Guelph Wellington
- Guelph Wellington will have a physician recruitment strategy to meet the needs of our growing communities
