HEALTH EQUITY QUESTIONNAIRE

Health care should be fair. Help us to do better.

Health equity means making sure that you can be as healthy as possible, regardless of your background or circumstance.

As healthcare providers we need to look at all the factors that affect your health. The more we know about you, the better equipped we are to provide you with the care that you need, the way that you need it.

Our aim is to help you get the care you need in the best way possible for you. We want to make sure everyone has the same chance to be as healthy as possible.

Your answers on the questionnaire will be treated with the same confidentiality as the rest of your medical file.

Participation is voluntary. You can choose to only answer some questions or not at all.

You can do the survey at home or you are welcome to discuss this further with your healthcare provider.

Your answers may help you:

- ✔ *Identify areas of your life that may be impacting your health*
- ✔ *Ask for help, referrals or information*
- ✔ *Open a conversation with your provider about your needs*

Your answers will help us:

- ✔ *Better understand you and the community we care for*
- ✔ *Improve and advocate for services*
- ✔ *Connect you to resources*
